

SANJITH GANESH

+1 (908) 672-2790 | gsj2442@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI/ML & Solution Engineer with an M.S in Data Science Degree, building enterprise GenAI agents, industrial ML systems, and cloud-native AI solutions. Experience across Gemini Enterprise, Vertex AI, Gen AI, ML Systems, predictive modelling, process optimization, MLOps and data pipelines.

EDUCATION

Rutgers University, New Brunswick, NJ | M.S. Data Science (Statistics) | **GPA: 3.6/4.0**

May 2026

SSN College of Engineering, Chennai, India | B.E. Computer Engineering | **GPA: 8.6/10.0**

June 2024

ACHIEVEMENTS

5th Place, All India National Hackathon (2023) | **Code Integrity Checker** adopted as official grading tool by SSN College CS Board; research paper under review, IJSRET | **Best Youthful Mind**, Shiv Nadar University – Vidhan Symposium 2023 | Top 5 Project Award – NLP & Statistical Software (2025)

TECHNICAL SKILLS

Languages: Python, SQL, Java, R, JavaScript, DAX, C

ML/AI: scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Alteryx, Statistical & Predictive Modelling, Anomaly Detection, Rule Based ML Process Optimization

GenAI/Agents: Gemini Enterprise, Vertex AI, Agentic AI, RAG, Langchain, Prompt Engineering, Enterprise Search, Agent Designer, Optimization (LoRA/PEFT)

MLOps/Engineering: Docker, MLflow, FastAPI, CI/CD, RestAPI, GIT, Linux

Visualization: Power BI, Tableau, Excel, Jupyter

Databases: PostgreSQL, MySQL, MongoDB, Oracle, ChromaDB

Web/Tools: Flask, HTML/CSS, Bootstrap, Postman, Jira, Bash

Cloud: AWS (S3, EC2 – basics), Azure (basics), GCP (BigQuery, CloudRun, Firestore), DataBricks

EXPERIENCE

Intuitive.ai - ML/AI & Solution Engineer

June 2026 - Present

Atlanta, GA | Vertex AI, GCP, Gemini Enterprise, Cloud Run, Firestore, Agentic RAG, MLOps |

- Developed **statistical, rule-based ML models** across **99+ wire products** for Southwire LLC spanning Drawing, Bunching, Extrusion, Stranding, Jacketing and Armor Lines targeting **higher throughput and lower defect rates** through process parameter optimization. (**Ongoing**)
- Architected an industrial ML platform on **GCP using BigQuery, Cloud Run, Firestore and FastAPI** for sensor data deploying **CI/CD and MLOps Pipeline** for model server monitoring and anomaly detection recommendation.
- Built a **high-code Financial Assistant agent** on **Vertex AI & Gemini Enterprise** integrating agentic **RAG** and **enterprise search** to automate variance decomposition, financial ratio analysis, cash flow forecasting and Excel Ready reporting, targeting **50%** reduction in analyst turn-around time.
- Engineered **multi step Agent Designer** workflows across enterprise data sources and reusable tool-calling components, targeting **50% faster financial analysis**; Extended agent towards reusable solutions across **Oil&Gas, Big Data and Life Sciences use cases**.

Eudaimonic Inc. – Software and AI Engineering Intern

Jan 2026 – May 2026

New York, NY | Python, LLMs, Prompt Engineering, JSON, Async APIs, REST | [GitHub](#)

- Designed and deployed **2 AI-powered workflow systems** (Interview.OS, News Without Doom) with LLM-based pipelines for structured extraction and summarization, reducing manual job-tracking & research time from **~2–3 hrs/day to under 30 min**.
- Built modular backend pipelines with JSON state management and async API orchestration for real-time data ingestion and implemented retrieval-based prompt engineering, **cutting redundant API calls ~40% via caching strategies**.
- Optimized end-to-end UX with state persistence and event-driven updates, accelerating iteration cycles and supporting multi-user scalability.

Wilmington, DE | Python, OpenCV, Oracle SQL, Power BI, Alteryx, SSIM, Power Automate & PowerApps

- Built an Automated PDF validation tool (OpenCV, SSIM, PyMuPDF) detecting mismatches across **1,000+ documents**, reducing manual QA time by **10+ hrs/week**.
- Built a fuzzy matching pipeline (Oracle SQL, RapidFuzz, Alteryx) with **~92% accuracy over ~5–10M records**, cutting runtime from days to hours.
- Built Power Platform automations (Power BI, Power Apps, Power Automate) for SAP Collections & Advance Payments, cutting month-end processing from **24 hours to 2 hours**.

RESEARCH PROJECTS

Predictive Modelling of mAb Fucosylation - Bristol Myers Squibb | XGBoost, SHAP, GPR, ANN | [GitHub](#) 2026

- Benchmarked **7 ML models on CHO cell bioprocessing data**, achieving **$R^2=0.83$** with **XGBoost+SHAP**; engineered 5 physics-informed features capturing **~75% of full model performance with 50% fewer variables**.
- Built an **automated data cleansing module** to preprocess and feed any dataset into the 7-model comparison pipeline, **with an integrated dashboard using PowerBI** visualizing performance metrics, feature importance, and cross-model rankings.

News Headline Classification | DistilBERT, RoBERTa, LoRA | [GitHub](#) 2025

- **94.2% F1** on AG News; benchmarked TF-IDF + Logistic Regression/SVM baselines; compared full fine-tuning vs parameter-efficient **LoRA with dropout regularization**.

Movie Recommendation Data-Warehouse Pipeline | SQL, Python, ETL | [GitHub](#) 2025

- **End-to-end ETL pipeline** to scrape, clean, normalize, and load movie metadata into a fact-dimension warehouse for fast SQL analytics.

Attendance Management System | PostgreSQL, Flask, HTML/CSS | [GitHub](#) 2025

- **Role-based DBMS** (Student/Teacher/Admin) with **PostgreSQL backend**, secure login, CSV import/export, and **dynamic dashboards**.

Automated Code Integrity Checker | Python, Flask, MySQL | [GitHub](#) 2024

- LMS-integrated plagiarism detection and auto-grading tool adopted by SSN CS Board; **1,000+ submissions with 92% accuracy** via AST comparison, **tokenization**, **Levenshtein distance metrics**, and rule-based grading with **regex parsing**.

Disaster Image Classification | TensorFlow, OpenCV, Flask | [GitHub](#) 2023

- CNN with 91% accuracy across **1,000+ Instagram tags**; applied transfer learning, data augmentation, image segmentation and edge detection. **5th place, All India National Hackathon**.

CLEF Flower Recognition | Python, OpenCV, TensorFlow, scikit-learn | [GitHub](#) 2022

- **Image recognition** model achieving **~85% accuracy** across **17 flower species** using **RGB-HSV transforms**, **K-means segmentation**, and **HOG + CNN** feature extraction on a **custom 1,000+ image dataset**.

LEADERSHIP

President, SMC Music Club | SSN College of Engineering | 2022-2024

Led a team of **20+ members** to plan and execute **30+** campus and inter-university events over 2 years, managing end-to-end coordination including artist bookings, budgeting, venue logistics, and cross-departmental stakeholder communication.

Executive Lead, Instincts | SSN College of Engineering | 2023-2024

Directed the end-to-end execution of SSN's flagship annual cultural fest, coordinating a team across promotions, sponsorship outreach, vendor management, and day-of operations for an event spanning 2,000+ attendees across multiple venues.

Additional Projects: GenAI/LLMs, Recommender systems, Image Processing, Network analysis, Applied Statistics, IDS/IPS, Time-series & Trend analysis, Exploratory Data Analysis, End-to-End Workflow and Process Automation, NLP and Deep Learning, Database Design & Optimization - [GitHub](#)
